The Boma collection, designed by Rodolfo Dordoni for Kettal, was born from the need of high performances of outdoor environment, without sacrificing the increasing demand for comfort that new products have to face.
Therefore the structure is organized around a frame entirely made of aluminum, capable of hiding in the essentiality of its lines either the quality of the used materials and the chance of easy articulation in different compositions.

Maintenance

Clean with mild soap using a sponge or cloth. Be gentle during the cleaning process; avoid aggressive scrubbing of the fabric. After cleaning, ensure you remove any excess soap.

For stubborn stains, use diluted household bleach. Act promptly to clean stains; the longer they linger, the more challenging they become to remove.

After cleaning, steam iron the fabric using only steam. Be cautious not to place the iron directly on the fabric, as it may cause damage.

Legs Options

Standard legs

Crossed legs

Finishes
