Kettal Mesh collection recalls architectural facades, which filter the surrounding environment without stopping the light and air flow. Industrial and natural materials, hard and soft surfaces, transparent and solid volumes are putted face to face in order to create this family of outdoor furniture based in contrasts.

Aluminium Maintenance

Clean with non-corrosive, non-abrasive cleaners to ensure the longevity and pristine appearance of aluminium surfaces. Avoid the use of scrubs pads or pressure cleaners, as these may cause damage.

Teak Maintenance

We recommend treating the wood with sealer every three months, or more frequently in the case of hotel and catering establishments. To restore the teak to its original appearance, sand the entire surface and apply the sealer.

Marble Maintenance

Clean only with a soft cloth, warm water and pH neutral detergent. Do not use: acids, ammonia, abrasive powders, window cleaners and so on. Any substance with an acid pH will damage marble: lemon juice, wine, etc. Marble is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the marble with sealant every three months, more frequently in the case of hotel and catering establishments.
