1/3

The Boma collection, designed by Rodolfo Dordoni for Kettal, was born from the need of high performances of outdoor environment, without sacrificing the increasing demand for comfort that new products have to face.

Therefore the structure is organized around a frame entirely made of aluminum, capable of hiding in the essentiality of its lines either the quality of the used materials and the chance of easy articulation in different compositions.

Maintenance

Aluminium
Protect surfaces with barrier elements like film, paper, and peelable lacquers before placement and handling. If accidental contamination or splashing of strong alkalis or acids occurs, wash the affected area with a large amount of clean water, especially cut-outs or holes and cavities.

Teak
We recommend treating the wood with sealer every three months, or more frequently in the case of hotel and catering establishments. To restore the teak to its original appearance, sand the entire surface and apply the sealer.

Marble
Clean only with a soft cloth, warm water and pH neutral detergent. Do not use: acids, ammonia, abrasive powders, window cleaners and so on. Any substance with an acid pH will damage marble: lemon juice, wine, etc. Marble is treated with a waterproof sealant to protect it from damp and stains (as long as they are cleaned immediately); however, this sealant naturally wears off over time. We recommend treating the marble with sealant every three months, more frequently in the case of hotel and catering establishments.

Table Top Colour Options		Other		
	Teak 904		Marble 079	
Table Top Colour Options		Glaze Paints (for Glaze)		
	Dolomite 373		Indian Sapphire 371	
			Erinite 376	
	Smoky Quartz 370		Jasper 375	
			Obsidian 372
