Collection
Pavilions

Lounge Pavilion aims to be part of a project. It is not understood as an item apart, but instead relates to its environment and melds with it. It is the project that is important, not the product, and this is its essence. Its rationalist construction seeks to give order, form and structure to the outdoor space, although, in terms of function, it has been designed to give shelter: to shade and cool or protect from the rain and wind.

Instructions

1. Select frame.
2. Select ceiling.
3. Select side closure type.

Please consider incompatibilities shown in table.

Select code, then specify desired side.

Table of Compatibilities

S	Fabric Ceiling	Aluminium Ceiling	Seer Curtain Set	Aluminium Side Panel
Fabric Ceiling	NO	NO	YES	YES
Aluminium Ceiling	NO	NO	YES	YES
Seer Curtain Set	YES	YES	YES	YES
Aluminium Side Panel	YES	YES	YES	YES

Lounge Pavilion Structure

Simple

With Single Bench

With Corner Bench

Columns

This profile allows the side panels and anchoring base to be attached.
The material is aluminium alloy 6005 T6.

Corner Column

4,77 kg

Beams

The crossbeam described below is a profile with several slits that is used to attach the side panels and the roof.
The material is aluminium alloy 6005 T6.

Simple Beam

6,1 kg

Footers

These elements are designed to provide a solid foundation, ensuring that the pavilion can withstand various weather and terrain conditions.

Common

The columns described below are components used in both standard and bioclimatic pavilions. This means that the sides are compatible in both cases. The difference, however, is that the bioclimatic column is machined at the bottom for the drain.
